Analysis of Italian society before the 2027 general elections

Since the fall of the Berlin Wall praised by the capital, which in reality was the overthrow of the ill-named International Peace “Cold War” (which was broken after the US defeat in Indochina, only by the Middle Eastern conflicts),

our national system is given internally by the cursed triple
of the transformations of the electoral system,
of the normalization and anti-popular limitation and repression of social conflict
and the denial of the fundamental right to worker representation achieved through the concertation shared by the confederal unions,

but it has always been tainted by national politics subservient to the US-led imperialist strategy,

1991 Iraq-1
1992-1994 Somalia-1
1992-1995 ex-Yugoslavia
1994-1995 Haiti-1
1999 Kosovo
September 11, 2001 and 2001-2021 Afghanistan
2000 Somalia-2
2003 Iraq-2
2004 Haiti-2
2004-2018 Pakistan
2011 Libya
2020: The genocidal Covid stunt, functional to the global 5G>6G control system
Palestine from 2023
Venezuela from 2025

An imperialist strategy unleashed to break down any illusion of peace that today is amplified with its evil and foul breath, of national and international “tolerance” towards Zionist Nazism, which, let us remember, brings with it the ultragenocidal strategy towards the entire planetary population (the Zionist project of reducing the world's population to less than a billion inhabitants).

The national pro-Zionists led by the fascist Meloni are still silent, the not coincidental circumstance of the alliance between Zelenski and the Zionists, and are trying to criminalize any different opinion.
As their radical chic friends had previously kept quiet, and indeed blatantly cheered, about "Islamist" terrorism that was only opposed by the Soviet Union, AND CERTAINLY NOT by "Israel".

If in 1978, faced with the Moro case, Italian citizens had understood that it was this abhorrence of a contemporary society led by imperialists and Zionists, (A true imperialist society of multinationals, just like that, the SIM !) that the bourgeoisie wanted to arrive and harness the state by imprisoning legitimate popular tensions, and that we absolutely had to not follow in the footsteps of Andreotti and Kossiga, but on the contrary we had to participate and experience the issues of life and society starting from the bottom,

perhaps we would not be at this point now, at the risk of soon finding ourselves a fascist President of the Republic, as a parody of a classist, bourgeois and racist and slave-owning system, and certainly not "a natural outlet" for the policies desired by the bourgeoisie and imposed on the population with a 360° filing of democracy.

It must be said in its entirety. Who is it that once it took hold with the special laws of "the fight against terrorism" (while the services managed and supported the black massacres, from Piazza Fontana to Brescia to Bologna), extended the media management of power with the Tortora cases, xxx, with Tangentopoli, with advertising for crime, from Peci to Buscetta, from Maniero to the now daily cases of femicides, of violence at 360° which distorts the very meaning of the population's life to the point of distorting the very personal lives of "law enforcement officials" who are no strangers to the terrible cases of every day ?
The delegation of the State to the specialty of the judiciary, entrusted by the power subservient to the master class in the years '70, has now become the general shift of social conflicts (even those of workers) within the courts, which may also have a correct meaning and logic in a socialist state, but is certainly not synonymous with justice in a state managed in large and significant parts, from crime.

The reactionary transformation of the state and the overthrow of our Constitution was the ultimate goal of all fascists and all traitors to socialism, first and foremost the bandit Bettino Craxi. BUT Socialism is still today, 37 years after the fall of the Berlin Wall, the only alternative system to the bestiality of Zionist imperialism. Zionism that brings all OF THEM together, from Meloni to the Cislini, from Confindustria to the pro-Zelenski Nazis.

Over the last 37 years, the strategy of transformation (immediately praised by the confederal serfs) of the Italian economy FROM agricultural and industrial TO logistics and warmongering has involved not only the general aspects of the capitalist crisis with its most immediate consequences to the detriment of the majority of the population, BUT also the specific aspects of EVERY work activity, and for the worse, at 360°, SILENCING any consideration of the anti-historicity and illegitimacy of the enormous power acquired by capitalists (particularly but not only by multinational capitalists) over the totality of the population.

The combination between the "control of information by large capitalist groups" and the exponential increase in economic competition waged by the advertising system (which is both the ratification and the outburst of capitalists) combined with the weight of the internet and the ever-increasing influence of advertising in every aspect of culture and information, is today the "square" where a sick country called Italy witnesses its own collapse, to the flight of brains and young people abroad, to its transformation from a sovereign country to a 51° US statelet.

That this is an infamous process already underway, we see far beyond and since before Trump, and among its consequences are the drop in national births to an all-time low, the cost of schoolbooks since middle school, the fragmentation affected by the masters and temporary agencies of secondary education, the excessive power of the capitalists' interest in university; overall, the decline in the social quality of life, the increase in working day time (up to 12-15 hours a day for 6 days a week), the rise in consumer goods prices, the insane growth of real estate power, the total division of the population between rich and poor, the privatization of industrial, banking, and civilian security services (when will private armies ?)... These are the consequences of 37 years of politics:
- by the “center left” who wants to protect power and keep the masses good
- by the “center right” who wants to serve imperialist capital and their own criminal interests.

In reality, in Italy, warmongering imperialist capital and its serfs intend to overthrow the Constitutional system of 1947 (what remains) as it is no longer compatible with the integral enslavement of the population.

The characteristics of the process underway in Italy of fascistization (underneath but not so much, racist) and enslavement (even sexist and chauvinistic) have long been there for all to see, and are now so evident that they have brought the grassroots unions, notoriously divided and fragmented (a historically growing process), to common deadlines, but, not surprisingly, and this is happening while social tensions are falling, despite widespread problems and discrimination, the number of strikes is decreasing. Everything suggests that the social explosion is in the air but is continually postponed with the slightest bullshit of every day. The general aspect is missing. There is a lack of practical intervention by the Party. There was no shortage of it in the seventies.

The Italian proletariat do not think that it has not understood the reasons for this.

The plight of the proletariat, the peasantry, and the exploited masses in all the oppressed countries of the world is merging with the general international situation; people's wars have increased in number and quality, repression and genocide are the weapons Zionist imperialism unleashes across the globe, but their chances of success are increasingly diminishing. The peoples of the world and the Communist Parties leading the people's wars are the vanguard not only of their respective peoples, but of the international communist movement itself. They are and must be our guide, the Italian proletariat, as well as that of other countries.

A few words to explain, on our part, the persistent failure to implement this practice since 2002. This stems from the technological torture that Italy has stubbornly inflicted on political opponents and inconvenient individuals since 2002, at the hands of the "forces of law and order." Complaints to the judiciary have been repeatedly filed by various comrades and targeted individuals, and have been publicly disseminated and online for some time. It's important for comrades to keep this in mind, because today it concerns a few, but tomorrow it could concern everyone.

FASCISM WILL NOT PASS!

Political Office of the Communist Party of Italy Marxist-Leninist-Maoist
